Sunman-Dearborn Online Academy (S-DOA) is not a school. It is an instructional and curriculum delivery program offered to all students enrolled at Sunman-Dearborn Community Schools. Students “enrolled” at S-DOA are enrolled at their Home School - East Central Middle School or East Central High School. In addition to the policies and expectations included in this handbook, students enrolled in S-DOA are also responsible for knowing and complying with the student handbook policies and expectations of their Home School.

Students are permitted to participate in all the activities of their Home School - field trips, class parties, PTO fundraisers, after-school clubs, athletics, co-curricular activities, and much more.

**High school and middle school students who participate in various activities must also enroll in the random drug testing program.*

**High school students must meet IHSAA eligibility requirements to participate in athletics.*

While S-DOA is open to all, it is not a perfect fit for all.

Is Online Learning for me? Online learning is a great fit for many students, but it's not right for everyone. Please read through the list below to determine if the Sunman-Dearborn Online Academy (S-DOA) is right for you:

- The student must be committed, self motivated and self disciplined.
- For high school, the student must be an independent learner and must have good time management skills.
- For middle school, the student must have adult support at home.

General Information

- Students can work on their S-DOA course anytime and anywhere that they have Internet access at home, school, or a library, anywhere!
- Each student will use their confidential Sunman-Dearborn Google username and password.
- Each student will have a Sunman-Dearborn staff member supporting them through their journey.
- Students have online discussions and/or chats in a secure environment.
- Final exams, formative assessments, and state assessments are proctored at the student's Home School of enrollment.
- All S-DOA courses and curriculum are aligned to Indiana state standards.

S-DOA Student Responsibilities

- Attend Parent/Student S-DOA Orientation.
- Login to Google Classroom and/or Edmentum Courseware each day to be considered present according to the Attendance/Grades expectations listed below.
- Attend live instructional sessions as required by your teacher.
- Complete all required activities including assessments, homework, and projects.
- Check your S-DOA email daily.

Students and parents should consider that an online course requires additional time and effort. Time management is essential. Online learning is more convenient and flexible, but is in some ways more difficult. Students should plan on spending approximately 5-6 hours each day working, and logging in at least five (5) times a week.

S-DOA Parent Responsibilities

In order for S-DOA students to be successful, parents must participate in the educational process of their children. The following are the parent responsibilities:

- Attend Parent/Student S-DOA Orientation.
- Check email multiple times during the week for correspondence from your child's S-DOA teacher or online success coach.
- Participate in monthly virtual parent/success coach conferences.
- Communicate with your child's S-DOA teacher whenever there is an instructional concern or issues
- Communicate with your child's S-DOA success coach whenever there is a non-instructional concern or issues

S-DOA Online Success Coach Responsibilities

Your Online Success Coach (OSC) has a very important role in your education at S-DOA. S-DOA success coaches are the main source of contact for all S-DOA non-instructional inquiries. The following are the success coach responsibilities:

- Attend Parent/Student S-DOA Orientation.
- Communicate with parents and students via email throughout the course of the school year.
- Schedule, coordinate and attend monthly virtual parent/teacher conferences. Students should be included as well.
- Resolve Chromebook and Verizon MiFi (if used) and other technology issues.
- Communicate and coordinate participation in free/reduced lunch (if parent qualifies), extracurricular activities, class field trips, and other traditional school based activities.
- Coordinate enrollment and registration.

Attendance/Grades

For grade levels 6-12, S-DOA is designed and intended to be a hybrid of both learning environments. Instruction is both live and computer-based. Therefore, students can work anywhere there is an internet connection. S-DOA students are recommended to work in their online courses daily. Student progress will be monitored closely. Although flexibility in choosing instructional times is a benefit to S-DOA, students must maintain their progress in all courses. Full time S-DOA students must meet attendance requirements.

Attendance will be tracked daily. A student will be reported to truancy upon receiving excessive absences according to their home school handbook. Once reported to truancy, a conference will be requested and held with the parent and student to determine if the student will be required to return to their home school. To be considered present students must log the following amount of time in the Edmentum Courseware:

- Students must work a **minimum** of 2.5 hours (150 minutes) for each course each week school is in session five (5) days. This is an average of 30 minutes each day school is in session.
- If a student attends a live session, the time will be counted towards the 2.5 hours (150 minutes) requirement.
- If a student is ahead **AND** maintaining a C or better in **ALL** courses, absentee will not be counted. This is a flexible program, if you keep pace.

Student grades will be monitored continuously. If a student is failing a class at mid-term or end of any quarter, the student will be required to attend all live instructional sessions. If a student is unable to attend live sessions, they will be required to attend online classes for the remainder of the semester at school with supervision.

If a student is failing two (2) or more classes at the end of any quarter, the student will be required to attend online classes for the remainder of the semester at school with supervision. The student will then be re-enrolled in traditional school for the next semester.

Enrollment/Registration

All S-DOA students are enrolled as students of Sunman-Dearborn Community Schools and their Home School (East Central High School or East Central Middle School). Parents will enroll students in both their Home School and S-DOA during the summer via the icon on the PowerSchool Parent Portal.

Technology, Textbooks and Course Materials

S-DOA will provide a Chromebook, all textbooks, and all course materials. Parents will be

charged a \$25 technology fee. Parents may also choose to participate in the Chromebook Protection Plan for an additional \$25. S-DOA will provide internet access, free of charge, if requested. Internet access is provided through a Verizon MiFi device. You must receive a sufficient Verizon cell signal in your home in order for the Verizon MiFi to successfully connect to the Internet. S-DOA students and parents have access to an award-winning suite of software tools by Edmentum.

Special Education

All accommodations, modifications, and services as detailed in a student's Individualized Education Program (IEP) will be provided for students with disabilities. Some therapies are not conducive to online learning. Those therapies may require the parent to bring the student to school. Some examples are Speech Therapy, Occupational Therapy, or Physical Therapy.

Extracurricular and Co-curricular Activities

S-DOA students are permitted and encouraged to participate in extracurricular activities and co-curricular activities. Research shows students who participate in extracurricular activities and co-curricular activities are more successful at school and learn important skills like time management, teamwork, and collaboration. Students must meet eligibility requirements as listed in the student handbook of the student's Home School.

High school and middle school students who participate in various activities must also enroll in the random drug testing program. Random drug testing occurs each month. If your student is selected, they must report to school to receive a random drug test kit, then go to the nearest hospital or clinic to complete the test. This must occur within 24 hours of being notified. High school students must meet IHSAA eligibility requirements to participate in athletics.

Password and Login

All students will receive a Sunman-Dearborn Google Gmail account and access to all G Suite applications including Drive, Docs, Sheets, Slides, and much more. S-DOA uses Clever to sync account credentials with other technology instructional software. Clever uses Single Sign-On (SSO), which allows students to use their Sunman-Dearborn Gmail credentials to access other technology instructional software, allowing easier access.

Assessments

Students will be expected to complete several assessments during the school year; standard classroom chapter and unit test, standardized formative assessments, final exams (high school) and Indiana required state assessments.

Standard classroom chapter and unit tests will be completed online from home. Local, standardized formative assessments will also be proctored online so students can complete

these from home. All Indiana required state assessments and final exams must be completed at school. Students and parents will be required to schedule an appointment.

Transfer and Withdrawal

Enrollment in S-DOA is for the entire school year. Transfer requests from S-DOA to traditional instruction will be approved only during the end of the semester, or if warranted due to extenuating circumstances. All transfers must be approved by the Director of Student Services.

Withdrawal from S-DOA will follow the same process as withdrawal from traditional school.

Code of Conduct

Students are all expected to conduct themselves with the same level of respect and courtesy as you would in a classroom environment. Any and all communication that is conducted via the phone, e-mail, discussion board or chat room must be done in an appropriate manner and tone. In addition, students are expected to follow their Home School code of conduct.

Cheating and Plagiarism

The temptation to cheat while taking an online course may be especially great; after all, a teacher is not there to watch you while you complete your work. Be fair to yourself and other students by avoiding the temptation and doing your own work. We fully expect you to complete all course work honestly. Repeated incidents of cheating or plagiarism may result in administrative transfer to traditional school. Cheating involves submitting work in a written assignment or exam that is not your own. Cheating includes:

- Copying someone else's work.
- Allowing someone else to copy your work.
- Having someone else complete your work for you.
- Using unauthorized material to help you complete your work.

Plagiarism is a type of cheating when you steal someone else's work and present it as your own. If you use the ideas, words, or statements of another person or source to support your ideas, you must always give credit to the person or source.

If your teacher detects cheating or plagiarism on a written assignment or exam, your teacher may recommend, depending on the severity of the cheating, that you receive:

- A reduced grade for the written assignment or exam.
- No credit for the written assignment or exam.
- A reduced grade for the entire course.
- A failing grade for the entire course.

Board Approved September 14, 2023

Appendix B - Student Technology Acceptable Use and Safety

Technology has fundamentally altered the ways in which information is accessed, communicated, and transferred in society. As a result, educators are continually adapting their means and methods of instruction, and the way they approach student learning, to incorporate the vast, diverse, and unique resources available through the Internet. The School Board provides Technology Resources (as defined in Bylaw 0100) to support the educational and professional needs of its students and staff. With respect to students, Corporation Technology Resources afford them the opportunity to acquire the skills and knowledge to learn effectively and live productively in a digital world. The Board provides students with access to the Internet for limited educational purposes only and utilizes online educational services/apps to enhance the instruction delivered to its students. The Corporation's computer network and Internet system do not serve as a public access service or a public forum, and the Board imposes reasonable restrictions on its use consistent with its limited educational purpose.

The Board regulates the use of Corporation Technology Resources by principles consistent with applicable local, State, and Federal laws, the Corporation's educational mission, and articulated expectations of student conduct as delineated in the Student Code of Conduct. This policy, its related administrative guidelines and the Student Code of Conduct govern students' use of Corporation Technology Resources and students' personal communication devices when they are connected to the Corporation computer network, Internet connection, and/or online educational services/apps, or when used while the student is on Corporation-owned property or at a Corporation-sponsored activity (see Policy 5136).

Users are prohibited from engaging in actions that are illegal (such as libel, slander, vandalism, harassment, theft, plagiarism, inappropriate access, and the like) or unkind (such as personal attacks, invasion of privacy, injurious comment, and the like) when using Corporation Technology Resources. Because its Technology Resources are not unlimited, the Board also has instituted restrictions aimed at preserving these resources, such as placing limits on use of bandwidth, storage space, and printers.

Users have no right or expectation to privacy when using Corporation Technology Resources (including, but not limited to, privacy in the content of their personal files, e-mails, and records of their online activity when using the Corporation's computer network and/or Internet

connection).

First, the Corporation may not be able to limit access technologically, through its Technology Resources, to only those services and resources that have been authorized for the purpose of instruction, study and research related to the curriculum. Unlike in the past, when educators and community members had the opportunity to review and screen materials to assess their appropriateness for supporting and enriching the curriculum according to adopted guidelines and reasonable selection criteria (taking into account the varied instructional needs, learning styles, abilities, and developmental levels of the students who would be exposed to them), access to the Internet, because it serves as a gateway to any publicly available file server in the world, opens classrooms and students to electronic information resources that may not have been screened by educators for use by students of various ages.

The Board prohibits the sending, receiving, viewing, or downloading of materials that are harmful to minors on computers and other technology-related devices owned or leased by the Corporation or connected to the Corporation computer network.

Pursuant to State and Federal law, the Board has implemented technology protection measures that protect against (e.g., filter or block) access to visual displays/depictions/materials that are obscene, constitute child pornography, and/or are harmful to minors, as defined by the Children's Internet Protection Act. At the discretion of the Board or the Superintendent, the technology protection measures may be configured to protect against access to other material considered inappropriate for students to access. The Board also utilizes software and/or hardware to monitor online activity of students to restrict access to child pornography and other material that is obscene, objectionable, inappropriate and/or harmful to minors. The technology protection measures may not be disabled at any time that students may be using the Corporation Technology Resources if such disabling will cease to protect against access to materials that are prohibited under the Children's Internet Protection Act. Any student who attempts to disable the technology protection measures will be subject to discipline.

The Superintendent may temporarily or permanently unblock access to websites or online education services/apps containing appropriate material, if access to such sites has been blocked inappropriately by the technology protection measures. The determination of whether material is appropriate or inappropriate shall be based on the content of the material and the intended use of the material, not on the protection actions of the technology protection measures.

Parents/Guardians are advised that a determined user may be able to gain access to services and/or resources on the Internet that the Board has not authorized for educational purposes. In fact, it is impossible to guarantee students will not gain access through the Internet to information and communications that they and/or their parents may find inappropriate, offensive, objectionable or controversial. Parents of minors are responsible for setting and conveying the standards that their children should follow when using the Internet.

Pursuant to Federal law, students shall receive education about the following:

- A. safety and security while using e-mail, chat rooms, social media, and other forms of direct electronic communications
- B. the dangers inherent with the online disclosure of personally identifiable information
- C. the consequences of unauthorized access (e.g., "hacking", "harvesting", "digital piracy", "data mining", etc.), cyberbullying, and other unlawful or inappropriate activities by students online
- D. unauthorized disclosure, use, and dissemination of personally identifiable information regarding minors

Staff members shall provide instruction for their students regarding the appropriate use of technology and online safety and security as specified above. Furthermore, staff members will monitor the online activities of students while at school.

Monitoring may include, but is not necessarily limited to, visual observations of online activities during class sessions or use of specific monitoring tools to review browser history and network, server, and computer logs.

Building principals are responsible for providing training so that Ed-Tech users under their supervision are knowledgeable about this policy and its accompanying guidelines. The Board expects that staff members will provide guidance and instruction to students in the appropriate use of Corporation Technology Resources. Such training shall include, but not be limited to, education concerning appropriate online behavior, including interacting with other individuals

on social media and in chat rooms, and cyberbullying awareness and response. Users of Corporation Technology Resources (and their parents if they are minors) are required to sign a written agreement to abide by the terms and conditions of this policy and its accompanying guidelines.

Students will be assigned a school email account that they are required to utilize for all school-related electronic communications, including those to staff members, peers, and individuals and/or organizations outside the Corporation with whom they are communicating for school-related projects and assignments. Further, as directed and authorized by their teachers, they shall use their school-assigned email account when signing up/registering for access to various online educational services, including mobile applications/apps that will be utilized by the student for educational purposes.

Students are responsible for good behavior when using Corporation Technology Resources - i.e., behavior comparable to that expected of students when they are in classrooms, in school hallways, on other school premises and at school-sponsored events. Communications on Education Technology are often public in nature. General school rules for behavior and communication apply. The Corporation does not approve any use of its Technology Resources that is not authorized by or conducted strictly in compliance with this policy and its accompanying guidelines.

Students may use Corporation Technology Resources to access or use social media only if it is done for educational purposes in accordance with their teacher's approved plan for such use.

Users who disregard this policy and its accompanying guidelines may have their use privileges suspended or revoked, and disciplinary action taken against them. Users are personally responsible and liable both civilly and criminally, for uses of Technology Resources that are not authorized by this Policy and its accompanying guidelines.

The Board designates the Superintendent as the administrator(s) responsible for initiating, implementing, and enforcing this policy and its accompanying guidelines as they apply to students' use of Corporation Technology Resources.
